

1. Watermark

A watermark of the "FIJIAN HEAD" and a bright new denomination numeral is visible on all denominations. Hold the note up to the light to see these two watermarks clearly.

2. See-through Feature

Hold the note up to the light and you will find that the white circle on the front of the note is neatly filled in with the patterns on the back of the note.

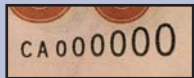

3. Hidden Text

Tilt the note at an angle to see the word "FIJI" on all notes.

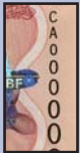

4. Signature

The signature of the Governor of the Reserve Bank of Fiji appears on the front of all notes.

5. Novel Numbering

The unique serial number of each note appears both horizontally and vertically on the front of all denominations. The digits of each number are progressively made larger to make counterfeiting more difficult.

6. Gemini™ Feature

The logo of the Reserve Bank of Fiji appears in a single colour on the bottom right hand corner on the back of all notes. Place the note under an ultraviolet light to see the colours split into two different colours, each different when viewed normally.

SECURITY THREADS

7. Security Threads - \$2, \$5, \$10, \$20 and \$50 denominations

The 3mm security thread is present on all notes except the \$100 notes. When viewed normally, the thread will appear as silver dashes and will feature the letters "RBF" and the "tagaga" logo. Hold the note up to the light to see the thread as a continuous line.

8. OPTIKS™ Thread - \$100 denomination

The new \$100 denomination features an 18mm wide OPTIKS™ security thread which features the "tagaga" logo. View the note normally to see the OPTIKS™ thread through a clear window on the front of the note. Hold the note up to the light to see the complete thread with the denominational number "100" written on the two parallel edges. View the back of the note under an ultraviolet light to see how the parallel edges fluoresce to yellow.

HOLOGRAMS & FOILS

9. Foil - \$10 denomination

The \$10 note features a foil with a star printed over it. Tilt the note to see a movement inside the star.

10. Hologram - \$20 and \$50 denomination

The front of the \$20 features a hologram in the shape of a fan and the front of the \$50 features a hologram in the shape of a turtle. Both holograms have an image of the same shape printed over it. Tilt the note to see different colours in the hologram. The letters "RBF" and "tagaga" logo is also clearly visible when the note is tilted.
